

Auction Paddle Pricing

"All of our paddles are 1-piece plastic paddles. No paper, no wood, no sticks, no glue, and no staples. Just unique, quality low-cost paddles that people look and feel good holding. A 'decent' paddle makes you more money at auction; just ask any one of our 1800 (in just 8 years) non-profit customers, all of whom are extremely cost-conscious. We make it a top priority to get and keep our prices as low as possible. We also have replacement paddles should some go missing. Whether you need just 5 or 50, just tell us the missing numbers and we'll get your set filled back in again. Its what we do! Perhaps the best part is that these replacements are priced using the CUMULATIVE number of paddles YOU have purchased to -date. The more you buy over time, the less your paddles cost- regardless of quantity. We are the ONLY one in the industry doing this- just a part of our commitment to bring MORE FUN and HIGHER BIDS to your auctions"

We have changed the way we produce our paddles which has now changed the way we price them. Pricing above is for our 'small oval' shape, our most popular. (See page 1 of the 'paddle shapes' .pdf for reference). We now beginning to start to produce and hold inventory the small oval shape paddles (with black numbers) in all of our white plastics. This makes it easy to subsequently fill in missing paddle numbers. Other shapes are typically just slightly more per paddle (\$0.15 to \$0.45) depending on shape complexity and size. Paddle orders include:

- Your choice of number sequencing (eg, 1-300; 101-250, leading zeros etc.)
- Your choice of number color.
- Ability to print your full color graphics to either side of paddle, see prices below.

NEW— Because all paddle numbers are now being printed directly to the plastic (rather than using vinyl) please add **\$0.25** to all prices above until we update our pricing. Visit our website for more information regarding pricing, products, and options or just call **866-667-2335** and ask for John— Thank you!

Additional Options:
